Standard toilet cabin TOI Fresh

The white color of TOI Fresh is indicative of the service quality and creates a feeling of space when you are inside it. Thanks to the factory-built lifting loops on the roof, this toilet cabin is suitable for placement on upper floors and at inaccessible places. TOI Fresh is also available in red color.

**Equipment**
- Urinal
- Toilet paper holder
- Clamps for hoisting with crane
- Integrated lock
- Anti-slip floor covering
- Marking "Men/Women"
- Occupied indicator
- Mirror
- Coat hooks

**Technical specifications**
- Dimensions: 1230 x 1230 mm
- Height: 2300 mm
- Weight: 82 kg
- Tank: closed, 250 l
- Tank for back flow with built-in double ventilation

**Options**
- Light
- Toilet seat
- Disinfectant dispenser
- Paper seat overlay

Standard toilet cabin DIXI

This was the cabin by which more than 35 years ago our holding commenced its business activity. With the advent of this toilet cabin, a new beginning has been made in the industry. DIXI is a tested and proven over time cabin. Practical, comfortable and functional – by using it your unit will have a contemporary appearance. It is made of UV-resistant plastic.

**Equipment**
- Urinal
- Toilet paper holder
- Anti-slip floor covering
- White translucent cupola roof
- Draught-free ventilation
- Coat hooks

**Technical specifications**
- Dimensions: 1230 x 1230 mm
- Height: 2300 mm
- Weight: 82 kg
- Tank: closed, 250 l
- Tank for back flow with built-in double ventilation

**Options**
- Light
- Padlock
- Disinfectant dispenser
- Paper seat overlay

Standard toilet cabin DIXI+

DIXI+ is the newest product in the EKOTOI’s catalogue. Thanks to its improved design, this cabin offers an advertising space. At your disposal there are three sides with dimensions of 184 x 91 cm each, and two smaller windows on the door.

**Equipment**
- Urinal
- Toilet paper holder
- Draught-free ventilation
- White translucent cupola roof
- Coat hooks

**Technical specifications**
- Dimensions: 1200 x 1200 mm
- Height: 2340 mm
- Weight: 108 kg
- Tank: 225 l

**Options**
- Light
- Disinfectant dispenser
- Paper seat overlay
Specialized toilet cabin for disabled people TOI Cap

This is a mobile toilet cabin for disabled people. By its area of more than 3m², this mobile cabin affords the people with reduced mobility and their assistants maximum freedom of movement and unobstructed use of the toilet.

**Equipment**
- Closed tank with ventilation pipe
- Dispenser for two rolls of toilet paper
- Stable rails on 3 sides
- Door spring
- Occupied indicator
- White translucent cupola roof
- Anchored ramp

**Technical specifications**
- Internal dimensions: 1480 x 1490 mm
- External dimensions: 1860 x 1570 mm
- Internal height: 2110 mm
- External height: 2240 mm
- Weight: about 127 kg
- Tank capacity: 151 l

**Options**
- Light
- Padlock
- Disinfectant dispenser
- Paper seat overlay

Luxury toilet cabin TOI Flush

This is the only cabin in the world, equipped with a special system that washes the toilet bowl at every door opening. The cabin is also equipped with a foot pump which, if the user wishes, can further clean the toilet. It does not afford a direct visibility to the waste water tank.

**Equipment**
- Wash-hand basin with 60-litre tank
- Automatic flush
- Foot pump for individual flushing
- Integrated freshwater tank
- Urinal
- Soap dispenser
- Paper towel holder
- Toilet paper holder
- Clamps for hoisting with crane
- Mirror
- Coat hooks

**Technical specifications**
- Dimensions: 1230 x 1230 mm
- Height: 2300 mm
- Weight: 119 kg
- Tank: closed 250-litre wastewater tank with integrated double ventilation

**Options**
- Light
- Disinfectant dispenser
- Paper seat overlay

VIP toilet cabin High Tech II

This is the most luxurious mobile toilet cabin in the world. Engineers were able to achieve maximum luxury on a minimum area in this cabin. High-quality materials and stainless steel were used for the interior. The cabin has a solar battery, which is charged during the day and provides lighting at night.

**Equipment**
- Foot operated fresh flush
- Solar battery
- Stainless steel bowl
- Urinal
- Liquid soap dispenser
- Paper towel dispenser
- Stainless steel toilet paper rack
- Mirror

**Technical specifications**
- Dimensions: 1200 x 1310 mm
- Height: 2310 mm
- Weight: 135 kg
- Waste water tank: 250 l

**Options**
- Padlock
- Disinfectant dispenser
- Paper seat overlay
Mobile urinal with four nests DIXI Kros

Mobile urinals are becoming more widely used in the organization of mass events such as festivals and concerts, as well as on construction sites. Easy to use and service, they are extremely comfortable, which makes them increasingly preferred. The integrated tank enables 1000 uses and by means of the dividing wall, one's privacy is not compromised.

Technical specifications
- Dimensions: 1150 x 1150 mm
- Height: 2000 mm
- Weight: 85 kg
- Waste water tank: 480 l

Equipment
- Strong and slip-proof floor
- Special stench traps
- Sight protection walls
- Transportable with forklift

Mobile field washbasin Duo

The mobile field washbasin Duo has two nests and is lightweight and comfortable for moving, with an option for quick installation and servicing. This portable sink requires minimal maintenance and is suitable for areas where water and sewerage have not been provided.

Technical specifications
- Dimensions: 960 x 600 mm
- Height: 1370 mm
- Clean water tank: 75 l
- Waste water tank: 176 l

Options
- Refilling with paper towels
- Refilling with liquid soap

Service vehicles

Service vehicles are an essential component of mobile toilet cabi
WC container men/women

Thanks to its surface area of 15 m², the men/women WC container is the perfect space solution. Depending on its internal arrangement, it can be used simultaneously by 8 persons.

**Equipment**
- Male: 1 toilet, 4 urinals, 2 wash-hand basins, 1 radiator 2 kW
- Female: 3 toilets, 2 wash-hand basins, 1 radiator 2 kW

**Technical specifications**
- Length: 6058 mm
- Width: 2438 mm
- Height: 2800 mm
- Power: 400 V/32 Ah
- Fresh water: 2 x 3/4” GEKA-Connector Socket
- Sewage: 2 x HT-Pipe NW 100

**Options**
- Clean water tank
- Waste water tank
- Electricity generator

WC container men/women/cap

This sanitary WC container, also including a section for disabled people, is the best solution for events of all sizes. By using it, you will receive all in one: toilets for ladies, gentlemen and for people with disabilities and other special needs. There is also a place for dressing infants.

**Equipment**
- Male: 1 toilet, 3 urinals, 1 wash-hand basin, 1 radiator 2 kW
- Female: 3 toilets, 1 wash-hand basin, 1 radiator 2 kW
- Wheelchair users: 1 toilet accessible to the disabled, 1 wash-hand basin, changing mat for babies, 1 radiator 2 kW, emergency bell

**Technical specifications**
- Length: 6058 mm
- Width: 2438 mm
- Height: 2800 mm
- Power: 400 V/32 Ah
- Fresh water: 3/4” GEKA-Connector Socket
- Sewage: HT-Pipe NW 100

**Options**
- Clean water tank
- Waste water tank
- Electricity generator
Shower/toilet Kombi container

Two in one. This sanitary container is the perfect combination of a toilet and shower. It will ensure your comfort, as at the same time you will save not only the rental, but also the transportation costs. This container is equipped with water-saving taps, which means that not only your water bills will be smaller, but also that you will contribute to the environment conservation.

Equipment
- 2 toilets
- 2 urinals
- 2 showers incl. shower curtain
- 4 wash-hand basins
- 1 200-litre boiler
- 2 radiators 2 kW

Technical specifications
- Length: 6058 mm
- Width: 2438 mm
- Height: 2800 mm

Equipment
- Clean water tank
- Waste water tank

WC Mini container men/women

The Mini men/women WC container is widely used because of its compact size. It has two compartments - male and female, as each one of them is equipped with a toilet, washbasin, coat hook, toilet paper holder and a soap dispenser.

Equipment
- 2 toilets
- 2 wash-hand basins
- 2 coat hooks
- 2 toilet paper holders
- 2 liquid soap dispensers

Technical specifications
- Length: 2438 mm
- Width: 1400 mm
- Height: 2500 mm

Options
- Clean water tank
- Waste water tank

Shower/toilet Mini container

Everything is arranged on a surface area of only 2.98 m². If your surface area for arranging a shower, toilet and a washbasin is limited - Mini is the perfect solution. The Mini shower/toilet container is the perfect bathroom unit for repairs, renovations, building sites or events. The mounted water saving fittings reduce the costs and contribute to the environment conservation.

Equipment
- 1 toilet
- 1 urinal
- 1 shower incl. shower curtain
- 1 wash-hand basins
- 1 boiler
- 1 radiator 2kW

Technical specifications
- Length: 1800 mm
- Width: 1800 mm
- Height: 2800 mm

Options
- Clean water tank
- Waste water tank
## Toilet Maxi container

This container is the perfect solution for large-scale events, when for limited period of time you have to provide maximum bathroom units.

The twenty-foot sanitary container is equipped with 16 toilets. Each toilet is equipped with a washbasin, liquid soap and a mirror. The container interior is arranged very simply – by entering the entrance door you get into a corridor, where there are eight toilets on each side.

### Equipment
- 16 toilets
- 16 wash-hand basins
- 2 paper towel dispensers
- Coat hooks

### Technical specifications
- Length: 6150 mm
- Width: 2530 mm (transport), 5000 mm (installation)
- Height: 2850 mm
- Weight: 4500 kg

### Options
- Clean water tank
- Waste water tank

## Shower Maxi container

The Maxi shower container is specifically designed to provide maximal effectiveness and maximum number of showers on a limited surface area.

This container is divided in two by a corridor. The ladies and male areas are separated in order to provide privacy. Each shower can be locked and is equipped with a washbasin, mirror and a coat hook.

### Equipment
- 16 showers
- 16 wash-hand basins
- Coat hooks

### Technical specifications
- Length: 6058 mm
- Width: 2438/2990 mm
- Height: 2850 mm
- Power: 400 V/16 Ah
- Freshwater: 3/4" GEKA coupling
- Wastewater: HT pipe NW 100

### Options
- Air conditioning
- Interior decoration
- Clean water tank: up to 7 m³
- Waste water tank: 8 m³

## VIP Premium Line sanitary container

The Premium Line sanitary container was developed for those who have high demands. The halogen lighting concept in the ceiling creates a very atmospheric ambience. The interior is presented in modern elegance: marble walls, tiled-flooring, noble washing and make-up facilities, air-conditioning, subtle background-music and a host of numerous accessories underline the noble ambience.

### Equipment
- Hi-Fi system (MP3 player)
- Air freshener
- Contact-free taps and urinals
- Ladies' hygiene accessories
- Illuminated make-up mirror
- Large make-up table with spacious surface
- Halogen lighting
- Radiator

### Technical specifications
- Length: 6058 mm
- Width: 2438/2990 mm
- Height: 2850 mm
- Power: 400 V/16 Ah
- Freshwater: 3/4" GEKA coupling
- Wastewater: HT pipe NW 100
Office container

In today’s dynamic environment of rapidly changing business we are more and more often required to use mobile, easily portable and functional offices. Our containers afford you the opportunity to build your office, virtually on every accessible place and in a very short time. The individual elements can be grouped as desired and with sizes according to your needs. **We can provide you with all the necessary furniture for your containers - warehouses, offices, locker rooms, utility rooms, etc. (p. 24)**

Equipment
- 1 door
- PVC windows (double glazing, two-way opening mechanism) - one on the short or two on the long side
- Built electrical installation (2 pcs. of lighting fixtures, 2 pcs. of power points, internal switchboard)
- External connection according to European standard
- All containers have a residual current circuit breaker

Technical specifications

**Container 20”**
- Length: 6000 mm
- Width: 2400 mm
- Height: 2800 mm

**Container 10”**
- Length: 2990 mm
- Width: 2438 mm
- Height: 2800 mm

Options
- Air conditioning
- Office furniture

Field kitchen

- 12 containers = 200 m² = kitchen
- 2 sanitary containers combined with shower + WC
- 2 containers changing room for personnel
- 2 x 50 m³ for clean water
- 6 x 8 m³ for waste water
- 6 boilers x 600 litres for hot water, air-conditioned
Storage container

Provide yourself the storage space required. The lockable doors, which are opened along the full width of the container, afford you the opportunity to easily store valuable and large-sized goods of any kind. If necessary, you can obtain the containers fitted with practical shelves and complete electric equipment. In future this will protect you from any losses and shortages. We have storage containers in three different sizes, allowing arrangement on three levels.

Technical specifications

Container 40”
- Length: 12 192 mm
- Width: 2438 mm

Container 20”
- Length: 6058 mm
- Width: 2438 mm

Container 10”
- Length: 2990 mm
- Width: 2438 mm

Options
- Redevelopment in a refrigerator/freezer container
- Light
- Warehouse equipment

Container “Cash/Ticket office”

The cash/ticket office type containers are mostly used for large-scale events such as concerts, sports matches and wherever ticket offices are needed. They can also be used as a lost property office.

Technical specifications

- Dimensions: 6000 x 2440 mm
- Height: 2800 mm
- Power: 400 V/32 Ah

Options
- Chair
- Desk

Container “Security kiosk”

Containers, used as a cash office/security kiosk, are of multifunctional assistance, which must be available at any large event.

Whether you use them as a cash office, security kiosk or for entry control, the glazing and the large opening windows provide you with the necessary circular overview. The security kiosk can be used as a cash office type container with one counter.

Technical specifications

- Length: 1500 mm
- Width: 1500 mm
- Height: 2500 mm
- Power: 380 V/16 Ah

Options
- Made-to-order option
Clean water tank

If you need clean water at the places where a water distribution network is not available, our tanks for clean water are exactly what you need. Depending on your needs, the capacity of our tanks starts from 0.5 m³ to 50 m³.

Technical specifications
• Transportation of clean water from mobile reservoirs through hydrophore pumps to a distance of 500 m. Included servicing - supply of clean water and disposal of waste water.

Waste water tank

You would like to organize an open air event or install sanitary facilities on a large construction site? No problem! With the waste water tanks you can meet the challenge.

Technical specifications
• Capacity: 2, 4, 5, 8, 10, 12, 20 m³

Options
• Connections: input and output
• 2 – 3 steps 5 m wide
• Disasters and emergencies

Mobile boilers and hydrophore pumps

Technical specifications
• Capacity: 600 l, 400 l, 200 l
• Water temperature: up to 90 °C

Usage
• Used for draining of facilities, pumping shafts and construction sites
• Disasters and emergencies
LUX trailer

The functional and simple design of our LUX sanitary trailer competes only with the feeling of comfort that remains in you. Easy to transport, it can be attached to the drawbar of the car, which further saves you transportation costs.

Technical specifications
- Length without drawbar: 5600 mm
- Length with drawbar: 7200 mm
- Width: 2500 mm
- Height: 3200 mm

Equipment

Male
- 1 toilet with vacuum pump
- 3 urinals
- 1 washbasin
- 1 hand soap dispenser
- 1 paper towel holder
- 1 mirror
- 1 convector heater
- Ventilation system

Female
- 3 toilets with vacuum pump
- 2 washbasins
- 2 hand soap dispensers
- 2 paper towel holders
- 1 mirror /on the whole wall/
- 1 convector heater
- Ventilation system
- The caravan has built in vacuum system for clean and waste water

VIP caravan

Our VIP caravan, embodying luxury on wheels, combines both comfort and innovative technologies together. The water-saving system takes care as for your money as well as for the environment.

Technical specifications
- Length without drawbar: 5600 mm
- Length with drawbar: 7200 mm
- Width: 2500 mm
- Height: 3200 mm

Equipment

Male
- 1 toilet
- 2 urinals with photocell
- 1 washbasin with photocell
- 1 hand-dryer
- 1 hand soap dispenser
- 1 mirror
- Heating and ventilation system

Female
- 2 toilets
- 1 washbasin with photocell
- 1 hand-dryer
- 1 hand soap dispenser
- 1 mirror
- Heating and ventilation system
- The trailer has an outdoors sewer system

Sanitary trailer

The service vehicle fleet of EKOTOI contains trailers, with the help of which we can easily deliver mobile cabins wherever needed.
Mobile lattice fence

This mobile lattice fence is designed and manufactured in such a way that to jump it over is almost impossible without help. The grid ends with protruding spikes, which are considered another protection of the areas surrounded by the fence. The fence is maximally simplified and can be assembled even by unskilled personnel.

Technical specifications
Panel: 3500 x 2000 mm
Tubes: 30 mm horizontal; 42 mm vertical

Options
• Pedestrian gate
• Hinge ring
• Gate wheel
• Anti-lift device
• Brace and soil pin for brace

Mobile solid fence

The elegant and discrete design makes these sheet steel sections ideally suitable for sealing off or protecting building sites.

Technical specifications
• Length – 2200 – 2400 mm
• Height – 2000 mm

Options
• Pedestrian gate
• Hinge ring
• Gate wheel
• Anti-lift device
• Brace and soil pin for brace
The fence is very suitable for concerts, rallies, sporting events or places where it is necessary to prevent accidents and to limit the access. It is safe for children, thanks to the minimal distance between the bars. The mobile crush barrier has a stable self-locking hook and can be assembled very quickly and easily. EKOTOI has available more than 5 km of fence necessary for your needs.

**Technical specifications**
- Panel: 2500 x 1095 mm
- Bar distances: 120 mm
- Tubes: 16 mm vertical (19x)
- 38 mm all round
- Weight: 19 kg

The mobile admission entry (gate) is a perfect solution for concerts, exhibitions, fairs and sports events. It can have 4, 6, 8, 10, 12 and etc. admission stations. The gates are hot galvanized and meet the European requirements for control and admission during public events.

**Technical specifications**
- Width: 1150 mm
- Height: 1200 mm
Chain link fence “Orses”

The “Orses” wire mesh fence system is an economical and safe solution. The base is made of galvanized steel columns, mounted vertically in the ground at a distance of 3000 mm from one another. Color range according to the RAL color chart.

Welded mesh fence “Triton”

The “Triton” welded mesh fence can be distinguished by its attractively profiled welded mesh panels. This not only gives the “Triton” a modern and representative appearance, but it is highly functional at the same time. In addition, the panel stability is improved by the distance between the posts. And the welded mesh panels can be secured by stainless steel straps as well as by suspending them from the posts. The height varies between 1030 and 2430 mm. Color range according to the RAL color chart.

Welded mesh fence “Pallas”

“Pallas” was developed especially for high user demands; the fine mesh makes this fence almost impossible to climb and the modular construction makes it easier to accommodate to the rise and fall of the terrain. And the welded mesh panels can be secured by stainless steel straps as well as by suspending them from the posts. The height varies between 600 and 2430 mm. Horizontal wires: 2 x 8 mm. Also as 2 x 6 mm (economy).

Vertical bar fence “Athos”

The fence represents an assembly of strong steel square profile. It looks stylish and ensures reliable protection of the fenced area. “Athos” is available in heights between 1000 and 2500 mm. Color range according to the RAL color chart.

Vertical bar fence “Atlas”

“Atlas” combines safety and durability with a characteristically elegant look. It is an assembly of solid steel cylindrical profiles. “Atlas” is available in heights between 1000 and 2500 mm. Color range according to the RAL color chart.
Vertical bar fence “Pegasus”

Vertical bar fence “Pegasus” is installed between posts and has been designed with a focus on safety and strength. Although this fence system was designed for heavy-duty applications, “Pegasus” is highly attractive and stylish, combining safety and durability with design. “Pegasus” is available in six different heights, ranging from 1000 to 2500 mm. Color range according to the RAL color chart.

Vertical bar fence “Olympus”

The aesthetic, elegant appearance of “Olympus” masks great inner strength. This superior strength and stability is made possible by the double top rail that provides extra anchoring for the attractive, protruding round bars. This fence responds to the need for attractive and safe fencing with a high degree of protection against acts of vandalism. Yet the rails have been designed to give the “Olympus” an elegant, non-aggressive look. “Olympus” is available in five different heights, ranging from 1250 to 2500 mm. Color range according to the RAL color chart.

Vertical bar fence “Heracles”

The hidden connection or the connection with straps makes the “Heracles” lattice fence extremely resistant to all raids. After placing, the poles are fastened with concrete. “Heracles” is available in heights between 800 and 2500 mm. Each panel can be adapted to the desired width. Color range according to the RAL color chart.

Vertical bar fence “Orpheus”

A valuable contribution to the HERAS range, the “Orpheus” bar fence is the newest in the range of security solutions. The “Orpheus” system is different from other fences in many ways but it fits in perfectly with an environment where security has to go together with aesthetics. Width of bar panel element: 2294 mm. Color range according to the RAL color chart.

Vertical bar fence “Juventas”

The design of the “Juventas” fence system is fine. It combines materials, sizes and structures other than the usual in order to minimize the possibility of physical injury. This fence is suitable for schools, play locations, swimming pools and etc. Height: 1250 mm. Color range according to the RAL color chart.
Sliding cantilever gate “iGate”

The “iGate” sets new standards as regards design, functionality and safety. The construction and use of high-quality aluminium guarantee reliability and durability. The elegant round shapes of the gate and the column combine with the perforated panels of your design to make an unmistakable statement. The “iGate” is available with a gate leaf that slides to the left or to the right. HERAS delivers your “iGate” fully preassembled.

Sliding cantilever gate “uGate”

The strong and cantilevered structure is made completely of aluminium, making it lightweight and very easy to operate by hand. The “uGate” is also available with the unique HERAS drives which operate the gate according to a smooth movement pattern. Its maximum dimensions, allowing a clear width of 12 m and up to 2.5 m high, make the “uGate” suitable for any applications one can think of.

Sliding cantilever gate “Delta”

A stylish and safe cantilever gate designed to match and compliment the “Heracles”, “Atlas” and “Pegasus” bar fence systems. “Delta” is ready for an electric drive and remote control as standard. Color range according to the RAL color chart.
The "SHB" sliding gate provides customised access, both in terms of height and width. The double-leaf configuration of this gate can even bridge a width of 26 meters. The rail guide, supported by a concrete foundation beam ensures that the gate runs stably. The gate has a protective feature to prevent it from running out of its rail and a durable guide in the form of the rolling mechanism. The sliding gate can also be combined with the "Heracles" fence system.

The innovative modular construction of the "Odysseus" gate line enables flexible transport. With the option of having the gate delivered as a pre-assembled unit, "Odysseus" is available in "Heracles", "Atlas", "Athos" and "Pallas". The clear width varies from 3 to 8 m for a single-leaf gate and a maximum of 16 m for a double-leaf gate. Color range according to the RAL color chart.

With a closed "Europa", the swing gate is no longer the weakest link of the total fence; the "Europa" is a part of your fence that keeps trouble outside. All parts are designed to make it absolutely safe and strong. The "Europa" is available in both single and double-leaf configurations. Universal coupling with the following fencing systems "Athos" and "Atlas". Color range according to the RAL color chart.

The "Euro gate" is an extremely robust and safe swing gate, available in different configurations to match the various styles of fence. The gate is available with a single-leaf or a double-leaf configuration. It is designed to match and compliment the "Heracles", "Atlas", "Athos", "Pegasus" and "Pallas" fence systems. Color range according to the RAL color chart.
Power generators

Usage
- Construction industry
- Warehouses
- Film productions and commercials
- Concerts
- Sports events
- State and municipal projects
- Urban and rural traditional celebrations
- Military events

Technical specifications
- Capacity: 200 kW, 160 kW, 120 kW, 100 kW, 50 kW, 30 kW, 10 kW, 5 kW

Options
- Distribution switchboards and cabling

Mobile lighting towers (automatic)

Technical specifications
- Maximum height – up to 9 m
- Generator 8 kW - 4 pcs. metal-halide x 1000 W
- Auxiliary output 3 kW
- Suitability for all kinds of terrains
- Automatic lifting of lighting fixtures

Telescopic mast for mobile lighting

Technical specifications
- Maximum height – up to 7 m
- Suitability for all kinds of terrains

Options
- Cabling and mobile electric power generator
Heaters with direct burning

Technical specifications
- Thermally protected heaters
- Electronic flame control
- Thermostat for control against overheating and ventilation
- Ability for connection of a thermostat by choice
- Combustion head from stainless steel

Heaters with indirect burning

Technical specifications
- Electronic flame control
- Thermostat for control against overheating and ventilation
- Combustion head from stainless steel
- Standard fuel vessel
- The housing remains cool in touch
- High volume of processed air

Additional equipment
- Thermostat TH5 with cable 3 m
- Range 0-36 degrees
- Flexible pipes with coating 7.6 m
- To be used with a set for pipe connections. Range -15 - +5 degrees
- Fixing tape included
Professional air conditioners

Technical specifications
- Air Conditioner Floor-standing
- 60000 BTU
- Fresh Air
